## DETAILED ACTION

### *Response to Arguments*

1. Examiner would like to set the record straight regarding applicant's opening remarks in the first paragraph of applicant's Remarks section. Applicant states that examiner and applicant agreed that the prior art did not show a system or method with the ability to provide measurement information or descriptive information with a portion of the environmental database model.

Respectfully, it must be recorded that both parties agreed that the prior art did not show the survey means as claimed in the preamble further supporting the measurement survey means in the body of the newly recited underlined claim language of the preamble, "...conducting one or more measurement surveys of a spatially distributed group of physical objects or networks..." and supported by the measurement survey means in the body of the newly recited underlined claim language of the body of the claim, "...with said measurement information or said descriptive information from said one or more measurement surveys".

Applicant agreed with examiner's suggestion to provide support for the measurement survey means from the preamble in the body of the claim. Thus, amending the claim language of claims 42 and 85 in this manner, overcomes the prior art of record, pursuant, of course, to a search with the amended claim language, followed by an interference search.

***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance for independent claims 42 and 85, including their dependent claims, 43 and 86, respectively:

the following prior art was found after the interference search of the claim language, US Patents; SANDERS 6,411,936 and GREEN et al 6,584,414 and the US patent Application Publication 2002/0129138. Each disclose subject matter related to the means of conducting measurement surveys. However, they do not disclose, either alone or together, the means of a predefined set of selections that are selected from a group consisting of icons and text strings representing collecting measurement data and descriptive data for the group consisting of measured performance metrics and inputted quality measures that are associated with conducting measurement surveys. Therefore, claims 42-43 and 85-86 meet necessary conditions for allowance.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
